

U Bolt

by TTF POWER TECHNOLOGY CO.,LTD

Catalog ID: UB001

U bolt is also u bolt clamp, or u clamp, just as the name suggests, this bolt for power and telecommunication line assumes a U-shape. Like other bolts for the electrical overhead line, U-shape is used for connecting dead end and even power line to the pole. It can be used on both the wooden and concrete poles.

Although they are known as U bolt, they are not all the same. Instead, there are some slight variations in the way that they are designed.

These variations of U bolts are; Round U bolt, Square U bolt, and Semi-round U bolt. All these designs or shapes of U bolts can be used on concrete poles.

U bolts for overhead power line come in different sizes. The smaller ones are mainly used for connecting ball sockets and tension clamps.

In terms of the construction, our U bolts are made of steel rod. This material is known for being strong and durable. It has a high tensile strength that can withstand external forces.

The steel rod is galvanized with a zinc coating that provides surface protection. The coating mainly protects against corrosion.

PRODUCTS DETAILS

=

Main Dimension(mm)

| | |
|------------|---------|
| C | 40 mm |
| D | 12 mm |
| E | 45 mm |
| L | 80 mm |
| M | 12 mm |
| Weight(kg) | 0.39 kg |

DATA

| | |
|------------------------|----|
| Rated Failure Load(KN) | 35 |
