

## Aluminum Clad Steel Formed Wire

**Catalog ID: 01A6H2G**

Formed Wire is a kind of power line hardware.

Also called guy-wire, guy-line, guy-rope.

Utilized ordinarily for transport poles, radio poles, wind turbines, utility shafts, and tents.

Installed radially, ordinarily at equivalent points about the design, in triplets and quads.

It can meet your power and utility needs.

### PRODUCT DETAILS

#### General

|                   |                               |
|-------------------|-------------------------------|
| Application       | Deadend for Neutral Messenger |
| Color Code        | Green                         |
| EU RoHS Indicator | Contact Manufacturer          |
| Material          | Aluminum Clad Steel           |
| Product Category  | Overhead                      |
| Type              | Formed Wire                   |

#### Dimensions

|        |                    |
|--------|--------------------|
| Length | 17 in (431.8 mm)   |
| Weight | 0.139 lb (0.06 kg) |

#### Conductor Related

|                              |                    |
|------------------------------|--------------------|
| Conductor Diameter – Maximum | 0.36               |
| Conductor Diameter – Minimum | 0.326              |
| Conductor Diameter Range     | 0.326 – 0.36       |
| Conductor Type               | ACSR, AAC and AAAC |

#### Logistics

|                 |      |
|-----------------|------|
| Pallet Quantity | 4000 |
|-----------------|------|
